

IBC Real Estate and Construction Committee
International Business Council, Bishkek, the Kyrgyz Republic

The Committee was created in June 2015 at the request of the IBC members. Practice shows that almost all construction companies face difficulties in relations with public authorities, especially while getting permitting documents.

Within the framework of the Committee aspects related to real estate (land issues, construction, state registration and much more) are raised and discussed. The committee includes not only construction companies, but also telecommunications, mining, consulting companies and developing partners.

Events

- Participation in the JIA Business Association Construction Committee. The IBC representative actively participates in the activities of the JIA Business Association which consists of more than 40 construction companies;
- IBC together with JIA succeeded in postponing the Order of the Mayor's Office #100 which prohibited construction companies to conduct any land work for the period from October 2015 to April 2016;
- Two associations organized an extended meeting with the Prime Minister of the Kyrgyz Republic on issues of the construction sector. The Prime Minister gave appropriate orders on various issues, such as simplification of the procedure of getting permitting documents for construction activity, solving problems of the companies while connecting to utilities (especially to electrical networks), etc. The orders are still being implemented by appropriate public authorities.
